

Group Project – Systems Analysis and Design

1. Title

Comprehensive ISAD Report and Presentation

2. Objective

In this group project, students will apply systems analysis and design concepts to a realistic information system problem. Each group will analyze the problem, identify requirements, and produce a consistent set of analysis and design artifacts.

3. Group Size

4–6 students per group

4. Project Requirements

Each group must analyze, design **one realistic information system** and submit:

- Problem description and project scope
- Functional and non-functional requirements
- **1 use case diagram**
- **1 detailed use case specification**
- **1 context diagram**
- **1 Level-0 DFD**
- **1 activity diagram**
- **1 ERD or 1 basic class diagram**
- Final report
- Presentation slides
- Peer evaluation and contribution evidence

5. Presentation

- Presentation time: 15 minutes
- Q&A: 5 minutes
- All members must participate.

6. Assessment

The project will be assessed based on:

- Teamwork and contribution
- Peer evaluation and version tracking
- Accuracy of analysis and design

- Integration and consistency across artifacts
- Report and presentation quality

7. Important Notes

- Focus on **analysis and design**, not coding.
- Use the notation taught in class.
- Keep all diagrams and report sections consistent
- Submit original work only

8. Submission Format

- Submit:
 - 1 PFD report
 - 1 slide file
 - Contribution/version tracking evidence
- File name format: **CSW309_Q4_2026_ProjectTitle**
